

Read the following instructions carefully.**Submit a ppt/pptx and pdf version of your poster.**

- Name your file **poster_<project_number>.-<company_name> - <project_title>.pptx**
 - For example:
 - poster_100.-Fujitsu - Smart City Apps.pptx
 - poster_100.-Fujitsu - Smart City Apps.pdf (used to make sure all fonts are embedded)
 - You can get the project number, company and project title from eLearning (Project List - SP2022 - Project Code)
 - The attached files are examples of the poster, feel free to modify the layout and sections, as described below.
 - You can also see more examples @ <https://utdesign.utdallas.edu/projects/>
- **Make sure to remove the text (*required) and complete the sections:**
 - **Impact and performance metrics were described as part of your project proposal, and are also part of the final report.**
 - The **impact** section: this is how is that the project will affect/benefit the sponsor company, your community/city/country, etc.
 - **Add at least 3 the keywords (words or short phrases that suggest the topic of your work:** i.e. Keywords: Artificial Intelligence, Machine Learning, Virtual Reality)
- *Keep the vertical(portrait), size 30x40 inches.*
- Avoid dark solid colors as background.
- **Ask your sponsor to approve the content, and make sure there is no critical information presented.**
- **Do not use any non-standard font.**
 - While creating the pdf, make sure that fonts are embedded
- **Feel free to change the box: size, location, and border color.**
- *Vectorize images whenever possible (to maintain the integrity of the graphics)*
- **No need to print the poster. You only need to submit the ppt/pptx and pdf version.**

Ask if you have any questions.
